

NEW CONSTRUCTION STARTING

In March 2018, enabling works for the construction on our new three-storey clinical building will get underway.

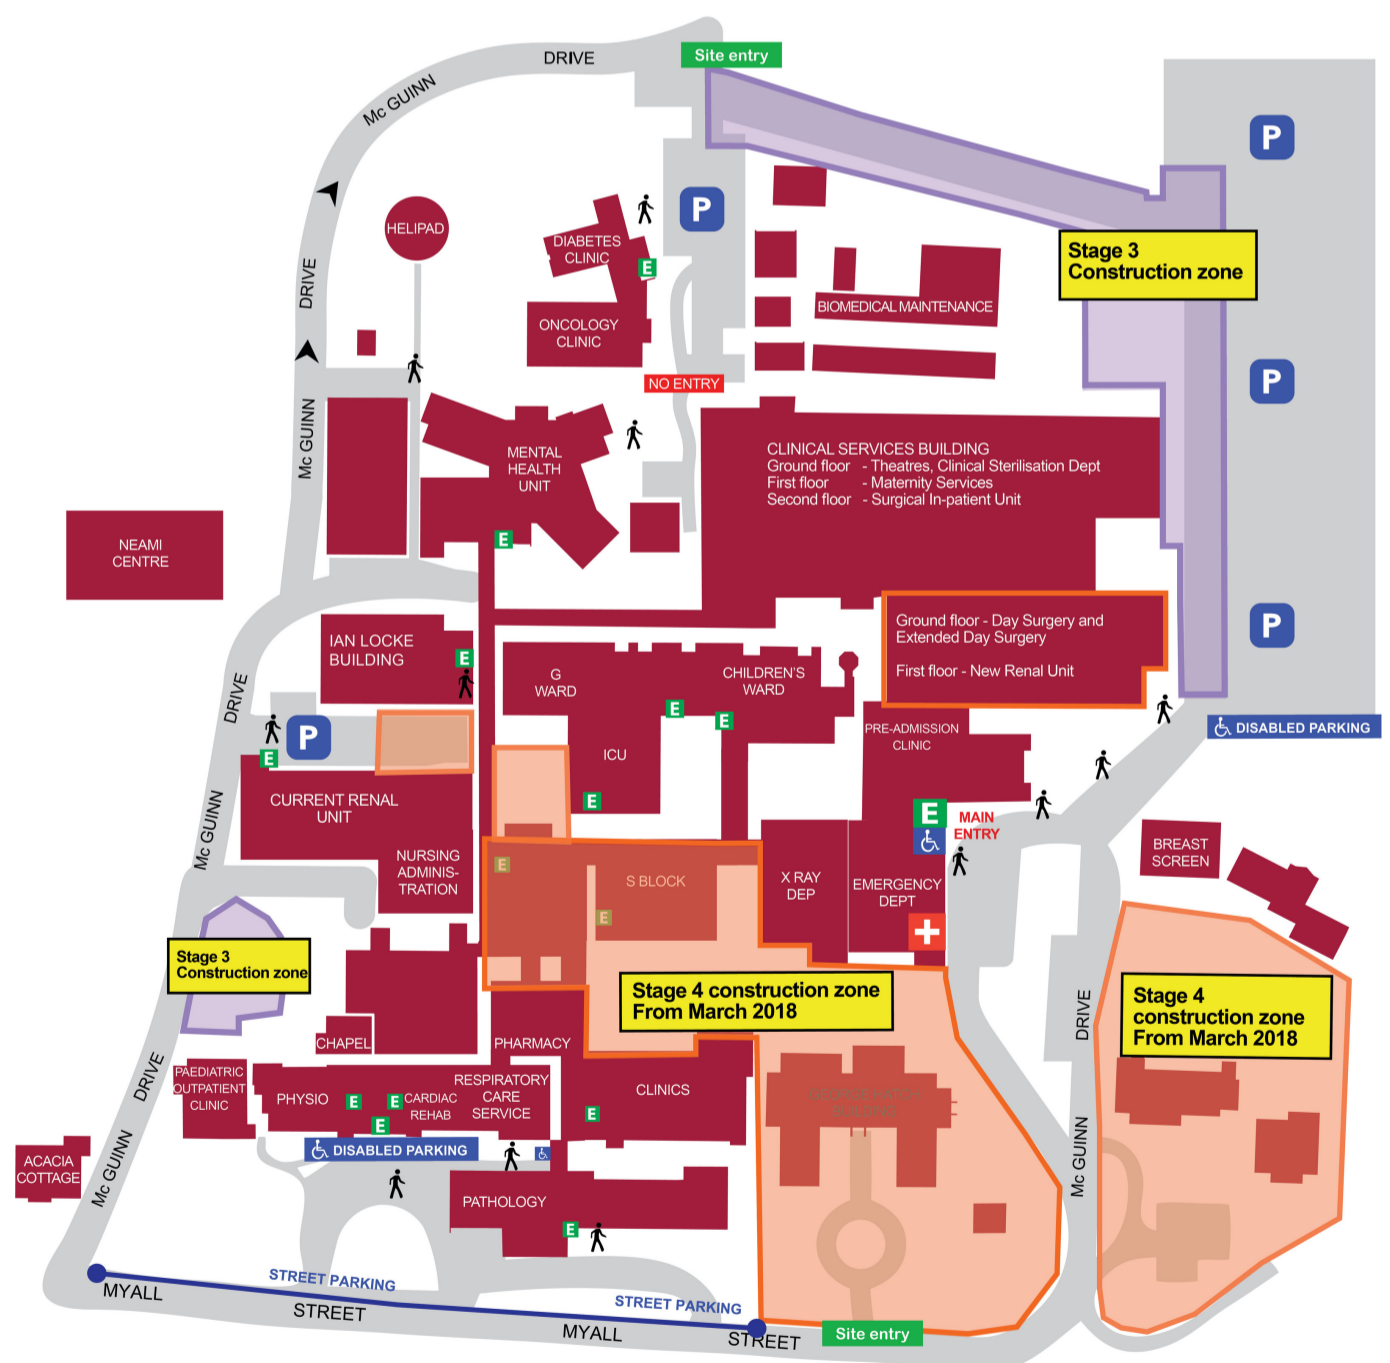

The new building will feature an Emergency Department and Short Stay Unit, a Medical Imaging Unit; an Ambulatory Care Unit, and a Critical Care Floor comprising of:

- Coronary Care/ Stroke Unit
- Intensive Care Unit
- Cardiac Catheter Laboratory

We'll also get a new main entry and reception area, drop off zone and additional parking close by. A map below shows the construction zones.

There will be some temporary disruption to pedestrian and traffic access during the construction period.

While every effort is being made to minimise disruptions, we appreciate your patience and support as we progress this important hospital redevelopment.

Please pay close attention to traffic control signs and drive carefully at all times.

Any issues or concerns about construction can be directed to:
